Michael was dealing with that. As far as I know they are being prepared.

Hi Marla,
There are two SEE employees here in the River Center. They started today. We will have an office

space for them to use here but they will primarily work from home. They are working on a very discrete project related to Bristol Bay and the requests we have received to use our Clean Water Act authority to prevent the development of mining in the Bristol Bay watershed. So working at home works well. The office space is available so they can come in to connect to EPA servers on the River Center's high speed lines for what ever purpose is at hand.

We have a single phone available at the River Center, owned by the Borough. I was looking to see if another phone was available. The Borough IT here said he can reprogram the phone to make it work on the system here.

I hope this clarifies things. If not let me know.

Phil

Subject: Re: Fw: Phones

I'm feeling a bit out of the loop on all this. I know there are two SEE's now, thought they were working part time in the Kenai River Center and part time from home. It feels like a bit of a moving target.

Hi Jim -

If I'm not mistaken, we only need one more for the Kenai/Soldotna office. Phil has his own phone plus one extra Cisco instrument. There will only be a total of three people in that office (which includes the two new SEE employees).

I'm not sure what needs to be done as far as configuring the phone or assigning a number. I think Phil has a handle on that and is working with the Borough.

Phil/Marla: Correct me if I'm in error on this.

Thanks...I missed that. As a "by the way," we don't usually send out phones to connect to another system. However, we do have quite a surplus and if the Borough doesn't have a problem with it, I could scare up a couple...

Phil,

I can send you a (Cisco) phone but the Borough would have to register it with their system anyway. Are they using Cisco phones?

I can get another phone through the Borough if necessary. I was just checking to see if there was an extra phone sitting around Anchorage, since that would be faster than waiting for a new phone through the Borough. We can figure it out at this end. No need to get us another desk top phone.

Thanks

Hi Peg,

We don't provide Phil with a phone, other than a cell phone. Is that what he is requesting? This should be in the "List any Supervisor identified nonstandard needs" section of the UMR so we can generate a request for a phone. Once I have that, I can order a phone for them.

PC Hotline should be sending new phones to replace the ones you gave to CID. We are working on getting the other phone numbers fixed. It appears to be an ACS problem.

Thanks,

Jim

Hi Jim -

We're expecting two new SEE employees in the Kenai office. Per Phil North's email below, he needs another Cisco phone instrument. I don't know when their expected start date is, but I suspect it's soon.

I'm also wondering about the status of the two phones to replace the ones I provided to the two CID folks. They were supposed to give them to me when they arrived, but apparently they haven't been received them.

Is this you, or Hotline? I don't know who does what any more.

Thanks Jim.

Phil --

I'm forwarding your message to Peg as she is in charge of the phones. What are the phone number going to be? Who is covering those costs?

Marla

Marla,
Do you have an extra phone that we can use here at the River Center for a SEE employee? There was one extra phone here. Two would be ideal. The phones are the CISCO 7960 Series.

Thanks
Phil
